**INTIMATE COMPUTING: TOWARDS A CARING
AND INSPIRING DIGITAL SOCIETY**

SYMPOSIUM DECEMBER 11TH 2024 - BLURRING THE BOUNDARIES: REFLECTING ON
ARTISTIC-LED RESEARCH ON DESIGNING HUMAN-TECHNOLOGY ENTANGLEMENTS

M. BIRNA VAN RIEMSDIJK

Digital technologies are becoming intimately interwoven into our daily lives

Social Media

Health & Fitness Apps

by Malou Beemer

by Anouk Wipprecht

High-tech Garments

Intimate Technologies

Digital technologies that **collect** and **respond to** people based on **highly personal data**

Personal & 'Agentic'

(reactive and proactive)

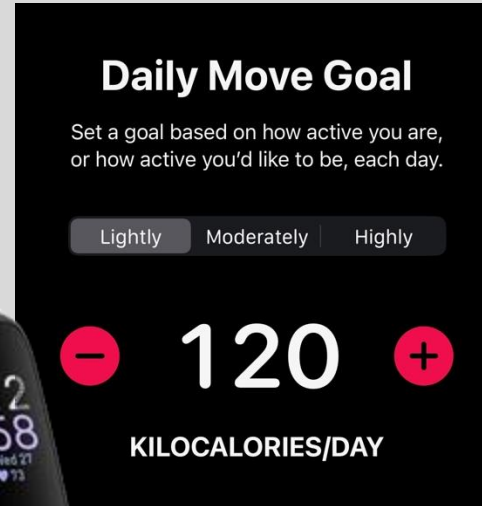

Intimate Technologies have potential benefits for enhancing and supporting us

 Meta

Enjoyment

Health

Disrupted
interactions

Intimate Computing

study how to shape the **interwovenness** between people and Intimate Technologies in a way that both aligns with people's **personal values** and accounts for their **personal vulnerabilities**

So that we create Intimate Technologies that **foster a caring and inspiring digital society!**

- 1. Aim of Intimate Computing**
- 2. Key Concepts in Intimate Computing**
- 3. Dancing with Intimate Technologies**

1. AIM OF INTIMATE COMPUTING

What would you like to have achieved with your Intimate Computing research 10 years from now?

Warm
Soft
Sensual
Move with you
Flexible
Safe
Embrace
Tender
Part of you
Sheltered
Close & Intimate

I would like our Intimate Technologies to feel like wearing a comfortable sweater!

“but if the technology is fully adaptive, it doesn’t really do anything?!”

Intimate Technology should also spark something!

Intimate Computing

What are the underlying **design and computational principles** for creating Intimate Technologies that foster a **caring and inspiring** digital society?

2. KEY CONCEPTS IN INTIMATE COMPUTING

PERSONAL VALUES AND VULNERABILITIES

Personal values

- Value = “what a person considers important in life” (Friedman et al.)
- abstract **motivations for action** (Schwartz)
- self-direction, friendship, comfort, achievement, inclusion, ...
- related concepts: norms, goals, preferences, habits, ...

Personal vulnerabilities

- Human vulnerability = “capability to be hurt” (Coeckelbergh, 2013)
 - arises from standing in **relation** to the world, **openness** to the world, and **engagement** with the world
 - not passive feature, we *make* ourselves vulnerable through the actions we **choose**
- Physical, psychological, social
 - capability to be **affected**

PERSONAL VALUES AND VULNERABILITIES

Personal values

Value-awareness: knowing where to move, sense of direction, purpose and **inspiration**, self reflection

Personal vulnerabilities

Vulnerability-awareness: regulate our openness to the world, enabling us to take better **care** of ourselves, each other and the world

How we engage with our personal values and vulnerabilities: **expression of personal identity**

RQ: How can Intimate Technologies **support** the expression of personal identity?

Vulnerability-aware Intimate Technologies

Don't forget the
forgotten!

3. DANCING WITH INTIMATE TECHNOLOGIES

FUNDAMENTAL CHALLENGES FOR VALUE- AND VULNERABILITY-AWARE INTIMATE TECHNOLOGIES

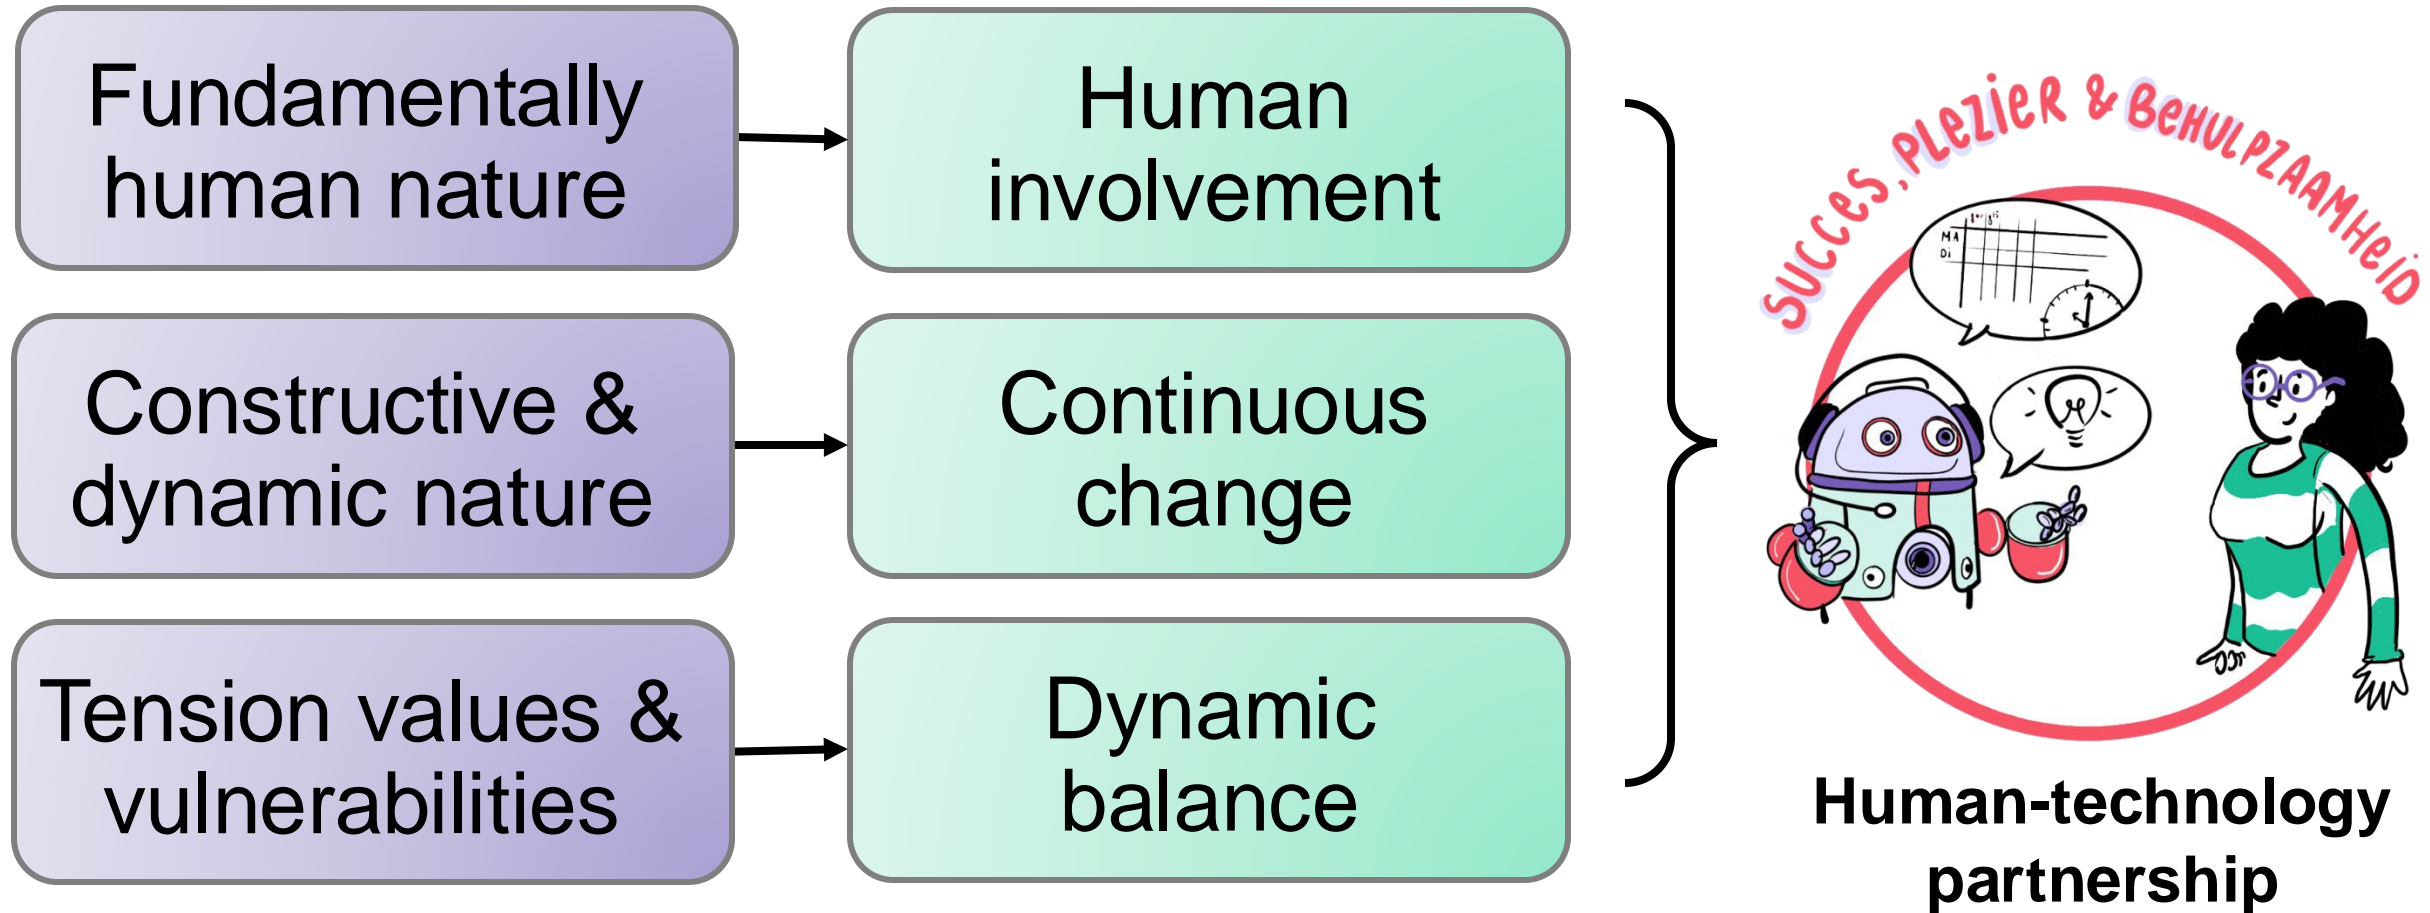

Fundamentally human nature

Tension values & vulnerabilities

Constructive & dynamic nature

NEED FOR HUMAN-TECHNOLOGY PARTNERSHIP

RQ: How can Intimate Technologies support the expression of personal identity **through human-technology partnership?**

**Designing Intimate
Technologies through
Dance!**

**Dance as metaphor for
human-technology
partnership**

**Dance performance for
connecting about the
ideas with others**

DISCONNECTIONS AND RELATIONSHIPS MEDIATED THROUGH INTIMATE TECHNOLOGIES

Conceptual prototype for an **AI-enabled intimate wearable**, aiming to support persons with **diverse communication needs** in navigating social interactions

SOME FIRST INSIGHTS FROM DESIGNING WITH DANCE

- Importance of **multidisciplinary collaboration** for Intimate Computing
- Centring **embodiment**
 - Human vulnerability rooted in embodiment
 - Embodiment of the technology
 - Different human embodiment as potential challenge for connection
- Use of '**tuning in**' techniques (mirroring and following) as ways of trying to connect

SUMMARY

- The aim of Intimate Computing is to investigate **design and computational principles** required for creating Intimate Technologies that **foster a caring and inspiring digital society**.
- This means that Intimate Technologies should support the **expression of personal identity** which we aim to realize through designing and computing with **personal values and vulnerabilities**.
- Models for computing with values and vulnerabilities should enable dynamic **human-technology partnership** which might be shaped as a **'dance' with Intimate Technology**.

ACKNOWLEDGEMENTS

Disconnections and Relationships mediated through Intimate Technologies (DiscReTe) project

Principal Investigator: Dr. M. Birna van Riemsdijk

Executive Manager/ Design Researcher: Dr. Michaela Honauer

Wearable Integration Designer: Malou Beemer

Creative Technologist (Software + Hardware): Emil Felix Jari Philogène Gravier

Initial Technological Support: Jonas Hentschel

Choreographic Work: Laisvie Andrea Ochoa Gaevska

Performers: Laisvie Andrea Ochoa Gaevska and Dennis Massar from ConCuerpos inclusive dance company

Event Organizer: Melina Petersen

Everything Video: Marcos Montero Grande, supported by Arash Hosseini Koupaei

Affiliated with: NWO gravitation project Ethics of Socially Disruptive Technologies (ESDiT), DesignLab/UTwente

Special thanks to:

DesignLab/UTwente, Interaction Lab/UTwente and Daniel Davison, Smart XP Lab/ UTwente and Alfred de Vries, Vrijhof/UTwente, FashionTech Farm, Marianna Alessandri, Dr. Edwin Dertien, Dr. Gwenn Englebienne, Jur van Geel, Dr. Juliet Haarman for their support.
